HTML

Full-Stack Development Lab

Instructor: Sir M. Fahad Qasim

Submitted by: Wasif Ali

Reg id: 245187

Class: BSCS F24 B

Lab No 03

Application Quality

The completed configurator should have a clear and professional interface with:

- meaningful content,
- readable typography,
- consistent spacing,
- clearly identifiable controls,
- appropriate hover and focus states,
- responsive layout,
- and a visually clear product preview and cart section.

The HTML, CSS, and JavaScript should be organized clearly and should use meaningful variable, function, and element names.

Code:

```
