LAB NO 06

Operating System Lab

Instructor: Ms. Muneeba Banaras

Submitted By: Wasif Ali

Reg ID: 245187

Class: BSCS F'24 B

LAB TASK

Lab Task 1: Number Analysis System

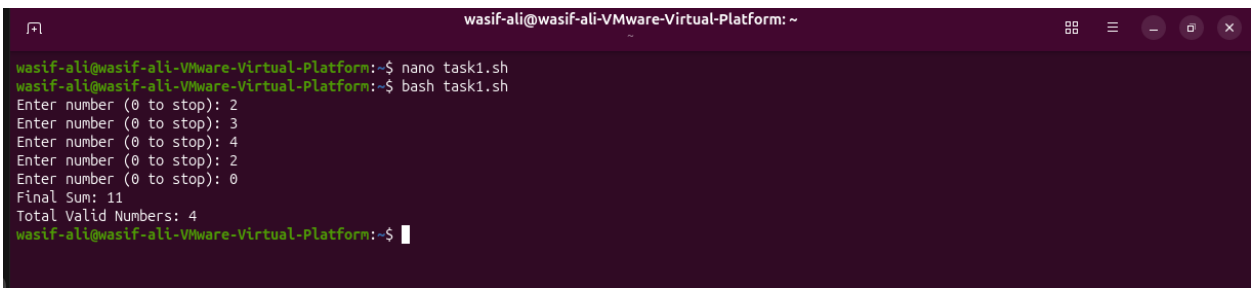

Problem Statement:

Solve the number analysis problem by developing a Bash script that accepts positive numbers until 0 is entered. Use an appropriate loop to calculate the sum and count of valid numbers. Change the program to handle negative numbers by displaying an error message without including them in the calculations. Show the final sum and count after the loop terminates.

Code:

Result:

Lab Task 2: Student Result and Scholarship System

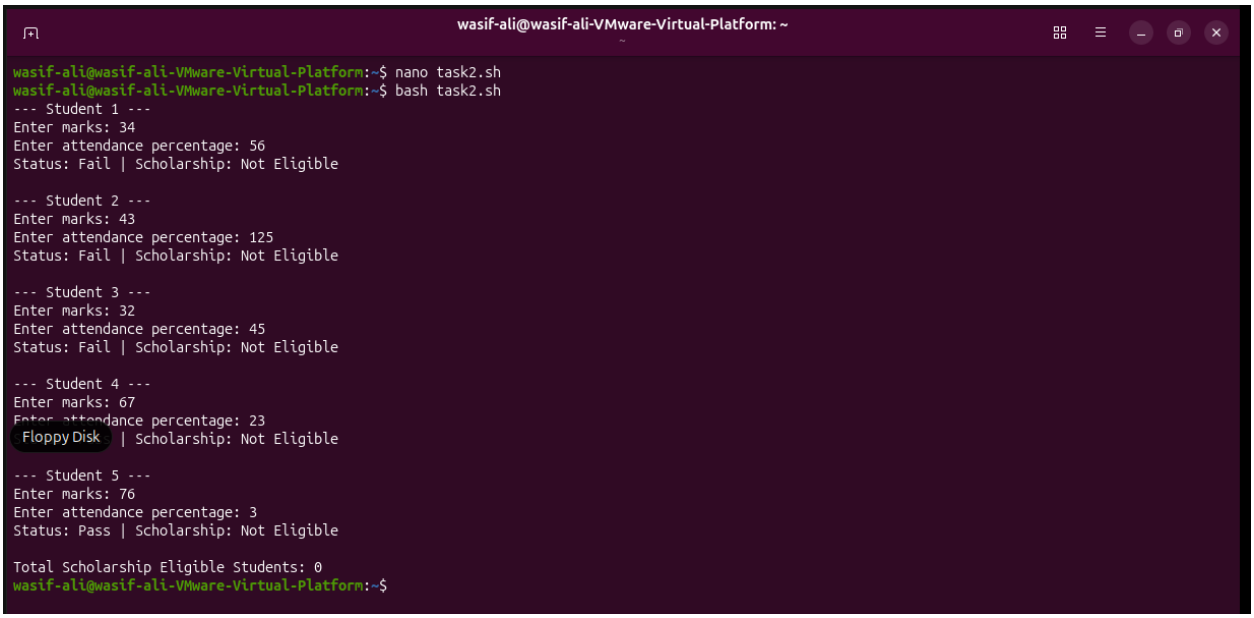

Problem Statement:

Prepare a Bash script that processes the marks and attendance records of five students. Use an appropriate loop and conditional statements to determine each student's pass or fail status. Relate scholarship eligibility to the student's performance by awarding a scholarship to students who obtain at least 85 marks and maintain 80% attendance. Produce a final report showing each student's result and the total number of scholarship-eligible students.

Code:
