Week 03: Blockly

Deadline: 07 Oct 2025

Blockly – Introduction to Block-Based Logic Programming Click to follow

1. Create **logic flow and event-driven behavior** visually without traditional coding.
2. Choose **any problem or small idea** and implement it using a **Visual Programming tool Blockly**.
3. Some examples to inspire you (but you are not limited to these):
   - A simple calculator (add, subtract, multiply, divide).
   - A mini-interactive story/game (e.g., a character moves on arrow key press).
   - A quiz app with 3–5 questions and score tracking.
   - A **random number generator** with hints (higher/lower).
   - A clock or timer.
4. **Submission**
   a. Export your Blockly workspace or take **screenshots** of your solution.
   b. Submit on LMS/Google Classroom before **next class**.
   c. Make a proper document of your solution.

Evaluation (10 Marks)	
Working project	02 Marks
Creativity in problem/idea selection	01 Mark
Clear use of Visual Programming blocks	02 Marks
Uniqueness: something unique e.g., sound effects, animations, or extra features.	02 Marks
Short written explanation	03 Marks
